Ig heavy chain precursor V region - ladyfish
C;Species: Elops saurus (ladyfish)
C;Date: 20-Jul-1990 #sequence_revision 20-Jul-1990 #text_change 21-Jul-2000
C;Accession: A34891
R;Amemiya, C.T.; Litman, G.W.
Proc. Natl. Acad. Sci. U.S.A. 87, 811-815, 1990
A;Title: Complete nucleotide sequence of an immunoglobulin heavy-chain gene and anal. A;Reference number: A34891; MUID:90138916; PMID:2105490
A;Accession: A34891
A;Accession: A34891
A;Residues: prelininary
A;Molecule type: mRNA
A;Residues: 1-568 < AME>
A;Cross-references: GB:M26182; NID:9213134; PIDN:AAA49238.1; PID:9213135
C;Superfamily: immunoglobulin C region; immunoglobulin homology
C;Kcywords: heterotetramer; immunoglobulin
F;33-116/Domain: immunoglobulin homology < IMM>

Patent No. 6034223
GENERAL INFORMATION:
APPLICANT: PROGENICS Pharmaceuticals, Inc.
TITLE OF INVENTION: NON-PEPTIDYL MOIETY-CONJUGATED
TITLE OF INVENTION: CD4-GAMMA2 AND CD4-IGG2 IMMUNOC
NUMBER OF SEQUENCES: 9
CORRESPONDENCE ADDRESS:
ADDRESSEE: Cooper & Dunham
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Query Match
